

F E A T U R E S

The Add-A-Fold® 2010 Valve is a multi-function valve originally designed to electrically control both cylinders and motors for light and medium duty truck applications. The modular manifold design offers optional gear pump or load sense versions, integral flow controls, and both high and low flow functions.

- Input Flows Up to 30 GPM
- Operating Pressures to 3500 PSI
- Section Flow Controls
 - Control speed of each function independently
- Optional Spin-A-Veyer® Valve
 - On snowplows achieves precise spreader material distribution
- Modular Sub-Base Design
- Level Ports, All Exit on Bottom Side
- Gear Pump or Load-Sensing Versions Available
- Optional Priority Section
 - Ensure section operation with all flow and pressure conditions

Installation Information

Valve Specifications

- Nominal Inlet flow rating.....30 gpm*
- Operating Pressure (maximum).....3500 psi
- Temperature Range.....-20°F to +180°F
- Fluid requirement.....petroleum based 50-2000 ssu
- Filtration Requirements.....ISO 4406 18/14
- Seals.....BUNA-N
- Mounting sensitivity.....none

Electrical Specifications

- Rated Voltage.....12 VDC
- Coil resistance (at 68°).....5.4 ohms
- Current.....2.2 amps
- Power.....26 watts
- Duty cycle.....100%
- Frequency.....50 Hz pwm
- Electrical connector.....Packard connector

Complete the control solution with the VT-15 or VT-25 Valve/Tank assembly. The VT-15 Valve/Tank assembly combines the valve enclosure, tank and all components under one easy to remove rubber latched cover.
