

### F E A T U R E S

The FORCE America PTO Control Module protects your PTO, reducing downtime and expanding its life.

Our control runs all SEIC functions as well as provides control over speed protection for your PTO. With the ability to automatically select between Stationary and Mobile mode based on truck criteria, you will be able to do small or big jobs without changing your truck configuration. Stationary RPM ramp level can be preset and cutout at settable RPM or vehicle speed levels to prevent excessive rotation on your PTO gears.

Compatible with MY2017+ gas or diesel Ford F-250 to F-750 trucks, our control module offers easy and quick installation.

- **Compatible with MY2017+ Ford F-250 to F-750 trucks**
  - Gas or Diesel
  - V8 or V10
- **Controls vehicle ramp up and operation based on truck criteria**
- **Automatically chooses between Mobile or Stationary mode based on truck criteria**
